

DYSLEXIA
Raising Awareness

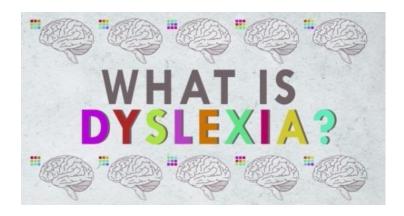

<u>AIMS</u>

By the end of the session you will:

- Have an increased knowledge and understanding of definitions of dyslexia
- Be aware of some of the common characteristics associated with dyslexia
- Have an understanding of Access to Education's identification process

What is Dyslexia?

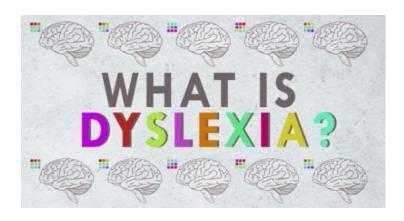

- Dyslexia is one of several Specific Learning Difficulties (SpLD) and affects the way information is learnt and processed
- Dyslexia is the most common SEN found in schools
- Challenges can include reading, writing and spelling. Some children also have difficulties with phonological awareness, memory and processing
- It is derived from two Greek words:
- dys = difficulty
- lexia = words

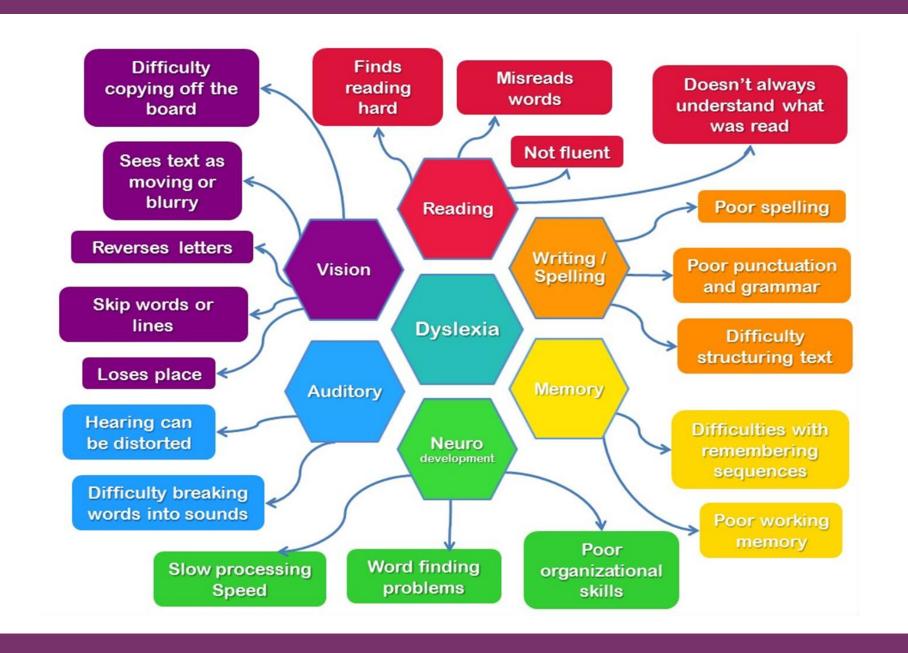

Other considerations

- Medical/visual/hearing difficulties
- Absence from school
- Language difficulties/deprived language
- English as an Additional Language
- Inappropriate teaching

Does not rule out dyslexia, but may be an explanation for learning difficulties

Did you know....?

- About 4% of the population are severely dyslexia and 10% show some tendencies
- Dyslexia is not an obvious difficulty; it can be hidden
- 4:1 boys to girls
- Dyslexia runs in families

Access to Education's Identification Process (Birmingham)

Access to Education have taken into account the most up-todate research and the British Psychological Society and Rose Report definitions in order to agree that, dyslexia occurs at the word level in terms of either:

- 1. Incomplete reading and/or spelling accuracy
- 2. Incomplete accuracy and fluency in reading and/or spelling

(Rose, 2009; BPS, 1999)

Access to Education's Identification Process (Birmingham)

These difficulties are persistent and severe despite appropriate learning opportunities within an assessment through teaching approach (BPS, 1999) and pupils have made less than expected progress following targeted interventions and the involvement of specialist support that has been tailored to pupils individual needs. (SEND Code of Practice, 2015)

Assessment through Teaching Pathway for the Identification of Dyslexia Step 1: Quality First Teaching School delivers Quality First Teaching. Has progress been made? If yes continue Evidence Needed appropriate level of provision. School able to evidence Quality First Teaching Step 2: Universal Support and Universal Support, voice of young person Class teacher/parent has concerns re progress; and parent. provide Universal Support. Has progress been made? If yes continue appropriate level of provision. Step 3: Targeted Support School able to evidence Targeted Support, voice Concerns continue so school involves of young person and parent. SENCo/school based specialist; provide Targeted Support. Has progress been made? If yes continue appropriate level of provision. School able to evidence Specialist Support, Step 4: Specialist Support which indicates specific word level difficulties. Concerns continue so school should involve specialist services to provide assessment and Targeted and Specialised Support delivered. consultation that considers a general Literacy Decision to be made by professional: is step 5 still difficulty or just a specific literacy difficulty. appropriate? If yes, deliver specialist intervention Has a general literacy difficulty been identified? If yes, continue with targeted and specialist support alongside step 5. to address all areas of difficulty. Step 5a: Schools to submit evidence of steps 1-4 which can be used within a consultation with the schools visiting EP and/or PSS Teacher. Specialist reading and/or spelling support will be planned together to include a standardised pre- and post- assessment carried out by EPS and/PSS and a targeted intervention carried out by schools. Step 5b; Standardised pre-assessment of word level skills, completed by PSS/EPS. School able to evidence Specialist Support, Step Sc: Specialist Reading and/or Spelling Support: At least 6-months of specialist reading and/or spelling voice of young person and parent. support implemented and adaptations made as needed and as recommended by EPS or PSS Step 5d: Standardised post-assessment of word level skills, completed by PSS/EPS. Step 6: Review of all evidence from steps 1-5 to inform report. 1) Progress has been made: continue appropriate level of provision. 2) Despite all of the above, there is a persistent difficulty: dyslexia can be identified. Continue with targeted

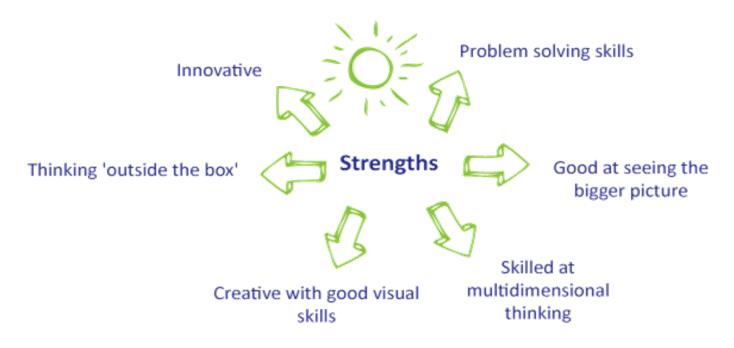

and specialised support to address all areas of difficulty.

d School Support

Identification

- There is <u>no single</u> test for dyslexia
- Dyslexia is evident over time following detailed and ongoing High Quality Teaching (HQT)
- It is a graduated process of observation, assessment, specific tailored support and high quality interventions which are monitored and evaluated for impact on pupil progress.
- It involves a collaborative approach- class teachers, teaching assistants, SENCO, English subject leaders and outside agencies.
- Includes working in partnership with parents/carers and pupils.

Strengths associated with Dyslexia

Practical ideas for learning spellings at home

- · create mnemonics for 'tricky' words
- a mnemonic is a memory aid and can help children to remember the spelling of tricky words
- mnemonics can be visual or written/auditory
 only practise one spelling until it is secure
 Written/auditory

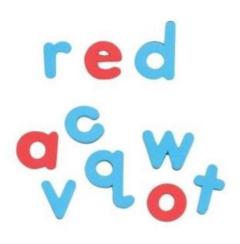

Big Elephants Can Add Up Sums Easily

Practical ideas for learning spellings at home

- · display illustrated key word lists around the home (on walls, doors, fridges etc)
- magnetic/wooden/plastic letters can be used
- make sure that the letters are lower case
 When spelling words with magnetic/plastic/wooden letters, try one colour for the vowels

Practical ideas for learning spellings at home

- Highlighting common letter patterns in words. i.e retreat and defeat
- Use a highlighter to visually show the difference. If using magnetic letters, try using a different colour for the letter patterns

street	good
green	food
sleep	blood
see	flood
three	stool
tree	wood

Children may have difficulty writing

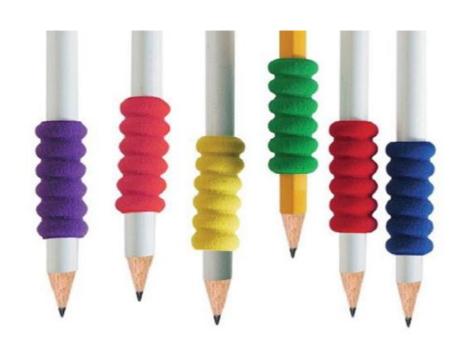

My Stoletar

He has got one grotherand one sister he has got two Black eyes and one Big noss He is my Brotherano His name si call Jonerhtan Les and he si nigno your old now this your. I lik my Brothter very much. he allwas fr a lot of thinks for my to agt. My forrity thinky is sweets Bocos I lik to ast swasts. Last your my Broken gave monkgi to meg to By some sweets. My Broker now works at Tiong Baro Plaza to by fook ps

Strategies to support writing tasks:

- writing frame: storyboard, sequence board, story mountain/map etc.
- · mind-maps
- multiple choice, true/ false
- scribe
- flow charts
- iPad 'Notes'

Comfort Pencil Grip - gives added comfort and security to those who grasp the pencil too tightly (The Dyslexia Shop, 3.90 for 10)

Writing Claw Pencil Grip - designed to help improve the hold of a pencil by correcting the position of a child's fingers (TTS Group, from £7.99 for 6).

Strategies to support writing tasks:

Fine motor skills activities can improve the handwriting of some learners

Children may have difficulty reading

- immediately forgets what has just been read
- slower reading speed
- misses out words or skips lines

 may be able to read fluently but can't answer questions about the text

http://www.independent.co.uk/extras/indybest/artsbooks/best-kids-books-dyslexic-dyslexia-reluctant-readersa7345621.html

Visual Stress

- Research has shown that 15 20% of people suffer visual stress to some extent
- Also known as Irlen Syndrome or Scotopic Sensitivity Syndrome (SSS)

Read Regular is created without copying or mirroring shapes. Therefore the frequency of repeated shapes in a text is decreased. This results in a minimum chance of visual distortions (swirl-effect). The aim is to create interesting typography that will maintain the readers' interest and will prevent them from getting bored or frustrated. Diversity in text knows many variations. We must understand the fact that typography for a novel is different from a magazine of a publication for education. Even so a novel has the potential to be clear and interesting. This can be achieved in any level of creativity, thinking on type size; leading, the amount of words on a sentence and the character/paper combination:

'The letters move or look back to front.'

'I get a headache when I read.'

'The words and/or letters split or appear double.'

'I find it easier to read large, widely spaced print, than small and crowded.'

Important to realise that children may not realise that this is a difficulty and may think it is the same for everyone – especially younger children

Strategies used by schools for visual stress

- space is left between lines
- a sans serif font such as Arial, Comic Sans, Verdana in size
 12-14 is used
- text will be divided into chunks (paragraphs, sentences, bullet points), paper may be enlarged from A4 to A3
- pastel/buff paper and coloured backgrounds on interactive boards can be used

Building confidence at home – creating independence

Magnetic/wooden letters Word lists/mats

Pens/pencils/pencil grips

Blank mnemonic cards (playing cards)

Clear acetates and pens

Post it notes Highlighters
Stop watch

Overlays/reading rulers
